

## *Ultracentrifuge Power for Small-volume Samples—Right on your Workbench*

### **AIRFUGE®**

AIR-DRIVEN ULTRACENTRIFUGE

The super-compact Airfuge Ultracentrifuge is a gigantic asset for your laboratory. It pellets nearly any material that can be sedimented in a full-size centrifuge or ultracentrifuge—right on your workbench and in a fraction of the time.

The Airfuge's remarkably short run times result from the combination of high *g*-forces and short path lengths. And run time is shortened even further by rotor acceleration to full speed—110,000 rpm at 199,000 x *g*—as quickly as 30 seconds.

#### DEDICATED APPLICATIONS INCLUDE:

- Binding studies
- Lipoproteins
- Clarification of lipemic samples
- Proteomics
- Sample preparation for electron microscopy
- Soluble solid/total solids ratios for food processing quality assurance
